

TECHSTONE

MULTITEXTURE

Multi-textured Coating is a type of latex coating designed to create textured effects. Portland-Eco offers a dynamic, three dimensional texture with a range of customizable options to match your unique style.

Its innovative design provides a rich, vivid and refreshing spatial perspective. Textured Wall brings in a new era of wall finishes, combining natural environmental protection with a captivating interplay of concave and convex surfaces.

Technical Specification

 Surface Drying Time	----- 4 hours
 Spreading Rate	----- 2.5kg/m ²
 Thickness	----- 1.mm/times
 Package Specification	----- 25kg/ barrel

Standard Application

- 01** Apply a primer on the flat base surface.
- 02** Apply main coat with cement plastering trowels or spray gun.
- 03** Apply a topcoat.

Product Features

-  Odorless
-  10–15 years life span
-  Highly Durable
-  Excellent water and alkali resistance with strong adhesion.
-  Superior weather resistance, preventing differentiation and flaking.
-  Easy to apply, allowing for versatile and unique designs.
