

TECHSTONE

OPUS

Opus Coating is composed of premium silicone acrylic emulsion blended with fine sand and advanced additives, creating a luxurious finish that exudes timeless European elegance. Designed for durability and beauty, it offers exceptional crack resistance, flexibility, and lasting protection. This eco-friendly architectural crystal diamond sand coating is ideal for both interior and exterior applications, providing a refined texture and radiant appearance that elevates any space.

Technical Specification

-  Surface Drying Time ----- 8 hours
-  Spreading Rate ----- 2 - 3.5kg/m²
-  Thickness ----- 1.5 - 2mm/main coat
-  Package Specification ----- 5kg & 20kg/bucket

Standard Application

- 01** Ensure that the wall is already skim coated, dry and even.
- 02** Apply a surface primer that is compatible with the substrate.
- 03** First, draft a line for the desired design joint and fill it in with the desired color paint. (Optional)
- 04** Put masking tape to secure the design joint during the process of applying the pattern coat. (Optional)
- 05** Apply the first coat of main coat.
- 06** Allow the surface to dry and scrape. Use the stainless-steel batch knife to flatten the surface and make sure it is flat.
- 07** After flattening the surface, apply the second coating.
- 08** Gently remove the masking tape to reveal the design joint. (Optional)
- 09** For the final step, apply a water-repellent top coat for the protection and long-lasting durability of the coating.

Product Features

-  Highly Durable
-  10 - 15 years life span
-  Self-cleaning
-  Adaptive design
-  Excellent coverage
-  Resist fading
-  Resist mildew
-  Prevents UV damage
